1. Claims 3, 10, 11 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, line 4, there is a lack of antecedent basis in the claim for "**said** plurality of pockets". In claim 10, it is not clear what is claimed. In claim 11, the apparatus is defined in term of work piece (molten metal). However, the work piece is extraneous to the apparatus. In claim 20, it recites the apparatus structure without further reciting the method step. Thus, it is not clear what further method step is claimed.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 11, 19 and 20 insofar as definite are rejected under 35 U.S.C. 103(a) as being unpatentable over MacNeill.

In MacNeill, the gas line 14 also serves as exhaust port. Thus, MacNeill substantially shows the invention as claimed except that he just use one gas line. However, it would have been obvious to provide a plurality of gas lines in the casting apparatus of MacNeill to speed up the pressure gas applying and exhaust process and thereby the casting process.

5. Claims 12-18 are allowed

6. Claims 2-9 are objected as depending from a rejected claim. However, they contain an allowable subject matter and will be allowed upon the rejection under 35 USC 112 being overcome (claim 3 only) as well as rewriting in an independent format.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.
